Faster  
communication  
Better interpolation  
and circle search

## 05 ➤ Comprehensive software functions, easier debugging

All SD860 servo drive parameters in one system can be uploaded/downloaded at one time via the EtherCAT network via the debugging software.

## 06 ➤ CE, STO, and UL

STO (Safe Torque Off) prevents unexpected injuries to operators nearby caused by accidental motor movement. The advantage of a drive with a built-in STO function is that it reduces peripheral devices, thus simplifies wiring, and saves more space.

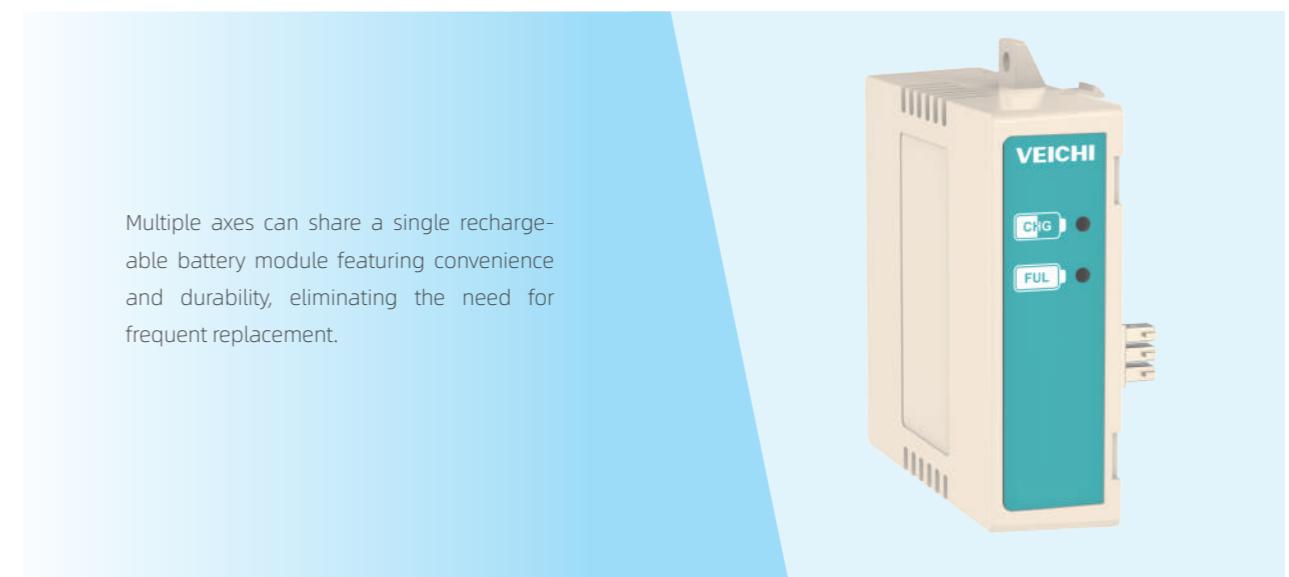

## 07 ➤ Multipurpose drive for both variable frequency and servo application

### Machine Tool Industry's Best Choice

SD860 integrates spindle, feed axis, and axis module expansion as required, providing a variety of control system solutions to deliver rapid, precise and stable control of the processes such as unloading, gripping, feeding, and cutting, which helps the customers to expand production capacity with higher efficiency.

## 08 ➤ Rechargeable batteries, fewer part replacement

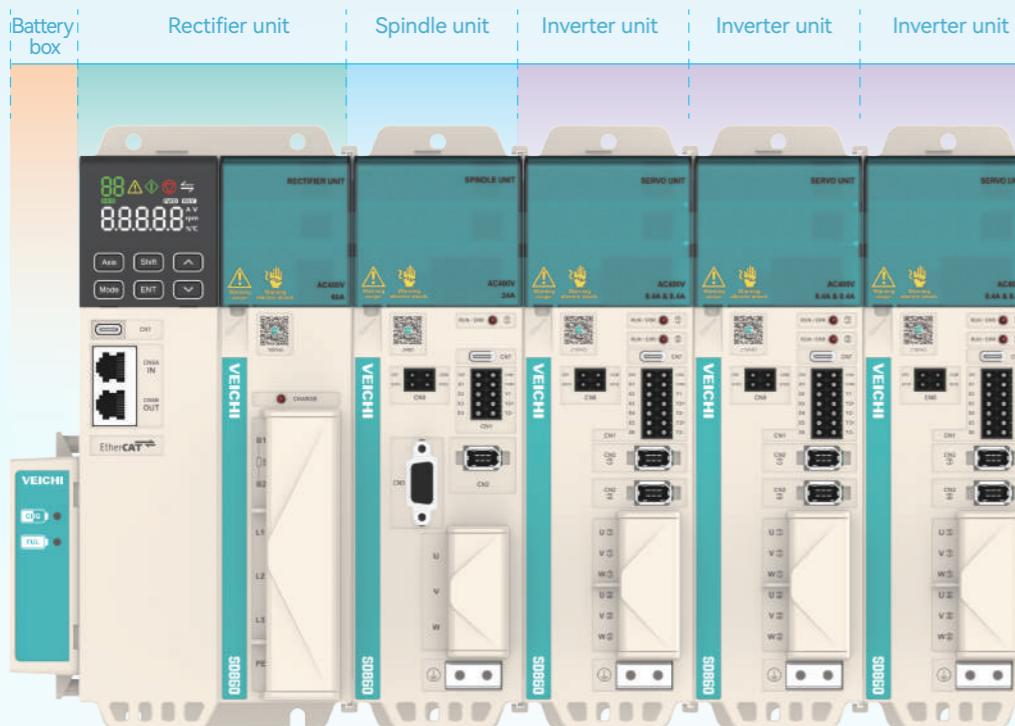

Multiple axes can share a single rechargeable battery module featuring convenience and durability, eliminating the need for frequent replacement.
